

Braided Lines
Fluorocarbon Lines
Nylon Lines
Tools & Accessories

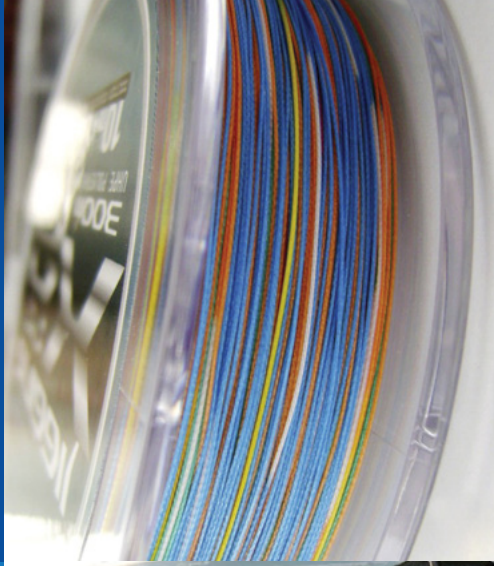

The primary emphasis of the LST (Line System) trademark lies in the development and production of top-notch braided cords, fluorocarbon, and nylon fishing lines. The company is headquartered in Nara, Japan, with a robust network of dealers spanning various parts of the globe.

Every product is meticulously manufactured using cutting-edge equipment and the finest materials, ensuring adherence to exceptionally high standards. The extensive product range encompasses fishing lines suitable for both freshwater and saltwater applications. Within their offerings, you can find options tailored for diverse fishing styles, such as classic jigging, rock fishing, trout, snakehead, catfish, and more.

Braided Lines

Braided lines are one type of fishing line composed of a braid of several non-stretch threads.

pages 4-9

Fluorocarbon Lines

Fishing line made from chemical polymers with high strength.

pages 10-15

Nylon Lines

Fishing lines with good strength and sufficient elasticity, allowing for effective absorption of fish jerks.

pages 16-19

Tools & Accessories

Fishing tools and accessories will help quickly replace lures, cut the line, or perform minor repairs.

pages 20-23

Braided Lines

Braided lines are one type of fishing line composed of a braid of several non-stretch threads.

Casting PE X8

The Casting PE X8 boasts an impeccably smooth surface, ensuring unobstructed passage of moisture through the guides. This premium-grade polyethene fibre enables you to discern the most delicate lure movements, offering utmost control. The intricate fibre weave, coupled with advanced thread weaving technology, imparts vibrancy to the fibre. It resists water, a moisture-repellent characteristic that holds immense significance for anglers. The fluorescent yellow hue facilitates visual oversight while manipulating the bait even in low-light conditions. Moreover, it exhibits a comparable density to black and experiences shallower sinking than the majority of its nearest counterparts

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Type	Packing (pieces)	Colour	Material

TV0000136251	1,5	0,209	200	28	12,5	Braided line	1	fluo yellow	UHPE Polyethylene
TV0000136252	2	0,242	200	30	13,5	Braided line	1	fluo yellow	UHPE Polyethylene

Aoriika PE X4

LineSystem's Aoriika PE X4 240m #0.6 Pink is a standout polyethylene line with a smooth surface for reduced friction in the guides, enhancing casting and sensitivity. Crafted from high-modulus, saltwater-resistant polyethylene, it's soft yet strong. The 240m spool features markings for easy segmentation. Ideal for squid fishing and versatile spinning styles, this Japanese-made line ensures top performance in a compact package.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Packing (pieces)	Colour
TV0000144766	0,6	0,128	240	1	pink

TV0000144768	1	0,165	240	1	pink

Jigging PE X8

The main advantage of the 8-strand Line System PE X8 is significantly reduced friction resistance when jigging. In this fishing style, where the action of jigging is repeated frequently, the stress is considerable. With an 8-strand PE X8 line, the slipperiness of the line is noticeably enhanced, making for a more comfortable fishing experience. Furthermore, the improved roundness reduces resistance, enabling smooth jig deployment, less susceptibility to tidal resistance, and allowing for a more linear, highly sensitive, and direct fishing approach.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour	Material

Sea Bass X8 Day Game

By assembling the Line System Sea Bass PE X8 into 8 strands, both casting distance and strength are enhanced, allowing for confident control over aggressive fights with trophy-sized sea bass without concerns about the line. Furthermore, the adoption of the Camouflage Silver colour line ensures low visibility by the fish.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour	Material
TV0000136261	0,6	0,132	150	9.9	4,5	1	camouflage silver	UHPE Polyethylene

TV0000136265	1,5	0,209	150	28	13	1	camouflage silver	UHPE Polyethylene

Sea Bass X8 Night Game

By assembling the Line System Sea Bass PE X8 into 8 strands, both casting distance and strength are enhanced, allowing for confident control over aggressive fights with trophy-sized sea bass without concerns about the line. Furthermore, the adoption of a highly visible yellow line ensures easy visibility even in low-light conditions, enabling swift response to line entanglements and facilitating a comfortable experience during night fishing sessions.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour	Material

Boat Light Game X8

The LineSystem Boat Light Game X8 line is designed for fine fishing starting from 0.6 size; this 8-piece PE set is specially crafted for boat fishing. It significantly reduces friction resistance, minimising guide trouble and line noise. The issue of low flexibility in thinner lines due to wind has been addressed by using an 8-piece configuration, resulting in a line with improved flexibility and manoeuvrability. This strong PE line can withstand various environmental conditions, ensuring it doesn't falter under any circumstances.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour	Material
TV0000136247	0,8	0,153	300	6,9	3,13	1	multicolor	UHPE Polyethylene

TV0000144782	1,2	0,191	300			1	multicolor	UHPE Polyethylene

Eging Super Cast X8

The LineSystem Eging Super Cast X8 line allows you to unlock greater casting distances for a bigger catch of fish with ease. Enter the world of squid fishing with this specialised PE line. This 8-strand braided PE line is tightly woven for maximum strength and reliability. Its exceptional stiffness ensures easy handling, even in windy conditions, and guarantees precision in your long casts.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour
TV0000136255	0,6	0,128	150	11,4	5,2	1	pink

TV0000136253	1	0,165	150	18,5	8,4	1	pink

Fluorocarbon Lines

Fishing line made from chemical polymers with high strength.

Eging Leader Super Soft Fluorocarbon

The Line System Eging Leader Super Soft line was crafted specifically for Egi lures. Its standout feature is its exceptional ease of knotting and its supple nature. For many anglers, knotting is problematic at two crucial junctions: between the PE and the leader, and between the Egi and the leader. The Eging Leader Super Soft line was made to address these concerns. Beyond its knot-friendly design, its flexibility enhances casting, paving the way for an improved fishing yield. Made of premium fluorocarbon material with a specific gravity of 1.78, it promises durability and strength. Its natural colour seamlessly integrates into various water conditions, making it less visible to fish and more effective in action. Measuring 20 metres, it provides ample length for various fishing endeavours.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour
TV0000136271	1,5	0,211	20	5	2,27	1	clear
TV0000136272	1,75	0,229	20	6	2,72	1	clear

TV0000144790	2,5	0,270	20			1	clear

Light Game Leader FC

The Line System Soft Fluorocarbon is for Natural Lure Action. Lures employed in light game fishing are characterised by their lightweight and compact design. Achieving a natural lure action becomes challenging with rigid and thick lines. The angler's intended actions can only be realised through supple and thin lines. The Light Game Leader FC precisely meets these requirements, providing the flexibility and slimness of fluorocarbon that fulfils this demand.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour
TV0000136274	0,6	0,128	30	2,5	1,13	1	clear
TV0000136275	0,8	0,148	30	3	1,36	1	clear

TV0000136277	1,5	0,205	30	6	2,72	1	clear
TV0000136278	2	0,235	30	8	3,63	1	clear

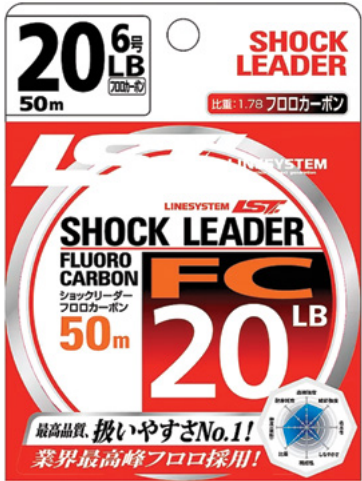

Sea Bass Shock Leader FC

When it comes to shock leaders in fluorocarbon, factors such as ease of knotting and maintaining knot strength are vital and the Line System Shock Leader has these in abundance. The true test lies on the fishing ground where real-world knot strength prevails over theoretical calculations. This line has undergone thorough research into its compatibility with PE lines, minimising strength reduction and yielding the finest shock leader. It ensures peak performance in the real world of fishing where knot integrity is crucial.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour
TV0000136281	2,5	0,260	30	14	6,35	1	clear

TV0000136285	5	0,370	30	22	9,98	1	clear

Shock Leader FC

The Line System Shock Leader FC is hailed as the most user-friendly fluorocarbon shock leader available. Much like nylon, the primary role of a shock leader is to bridge the main PE line with the lure and the fish. A crucial aspect of this is the ease of knot-tying. Merely having the elasticity reminiscent of rubber, which enables stretch, is insufficient for controlling and landing fish. This fluorocarbon is uniquely designed, boasting both the flexibility that ensures clean and secure knots and the low stretch combined with strength essential for withstanding the vigorous fights of fish.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Packing (pieces)	Colour

Shock Leader FC Soft & Strong

LineSystem's Shock Leader FC Soft & Strong line is an exceptional 100% fluorocarbon blend that seamlessly combines softness with unparalleled strength. This fluorocarbon is designed with a harmonious blend of features, making it a multipurpose choice with softness, low stretch, and high strength, ideal for crafting shock leaders in various fishing techniques such as Spinning, Eging, Light Rock Fishing, Bass Fishing, and more. Its user-friendly nature allows for easy knot tying, ensuring a natural action for your lure. Plus, its compact spool design makes it conveniently portable, fitting effortlessly into a small pocket for on-the-go fishing adventures.

Zalt's Bass Hard Fluorocarbon

The LineSystem ZALT's Bass Hard Fluorocarbon line is a no-compromise choice. Leveraging fluorocarbon's unique properties to address nylon's weaknesses, this line boasts a specific gravity of 1.78 (compared to nylon's 1.14), ensuring rapid sinking and reduced surface disturbance for enhanced straight-line performance and heightened sensitivity. With its low initial stretch, this fluorocarbon delivers exceptional sensitivity even with minimal weight. Its firm and robust construction sets it apart, allowing you to experience fluorocarbon's distinctive features to the maximum. Elevate your fishing game with the unparalleled performance of LineSystem ZALT's Bass Hard Fluorocarbon.

Black Sea Bream Chining Leader

LineSystem's Black Sea Bream Chining Leader line is meticulously crafted for unparalleled performance. This leader boasts enhanced pliability, superior binding strength, and exceptional abrasion resistance, ensuring it stands out as the ultimate choice for anglers. Crafted with supple fluorocarbon for a secure tightening experience, it seamlessly pairs with PE, offering a versatile fishing solution. The flexible absorption feature guarantees intense hooking and swift chino draws, making it the go-to leader for all fishing enthusiasts.

Boat Egging Leader Fluorocarbon

The LineSystem Boat Egging Leader Fluorocarbon line is designed specifically for squid fishing. Its nearly identical refractive index to water renders it practically invisible, even to squids with exceptional vision. This leader material boasts resistance to abrasion, ultraviolet radiation, and harsh environments, ensuring it maintains its properties over time. The spool is thoughtfully equipped with an elastic bandage, preventing any inadvertent unwinding of the fluorocarbon during storage and transportation.

Nylon Lines

Fishing lines with good strength and sufficient elasticity, allowing for effective absorption of fish jerks.

Iso Fukase Suspend Nylon Line

The Line System Iso Fukase Suspend fishing line is a state-of-the-art product tailored for professional anglers. Made from nylon with a specific gravity of 1.14, this line is fluorescent orange in colour, ensuring visibility. Each spool offers 150m of line, split into two 75m segments for convenience. As coastal fishing faces increased pressure in recent years, there's a growing demand for lines that can handle intricate tidal currents while also boasting the strength to land large catches even with thinner line sizes. The Iso Fukase Suspend rises to this challenge, maximising both handling and strength with the latest technology.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Type	Packing (pieces)	Colour

Salt Water Nylon

The LineSystem Salt Water Nylon line is a versatile solution catering to all aspects of sea fishing, from family outings on breakwaters to thrilling lure fishing adventures. The line features a blend of blue for optimal visibility and camouflage, seamlessly integrating with spinning reels thanks to its flexible treatment. Crafted with a resin to eliminate saltwater residue, the line undergoes a final surface treatment for enhanced resistance to seawater salt. Despite its spool form, it delivers remarkable casting distance and manoeuvrability. With LineSystem's innovative 300m perfectly parallel winding method and a convenient 75m interval quantity seal, it offers exceptional cost performance, allowing for up to four separate uses.

Item Code	Length (meters)	Test (lb)	Type	Packing (pieces)	Colour

Bobbin Nylon

The LineSystem Bobbin Nylon line is designed for various fishing applications. This universal fishing line is available in large spools, with thicker diameters well-suited for trolling and plumb line fishing. It is a reliable and low-maintenance option suitable for use in any reservoir. The LineSystem Bobbin Nylon offers all-season performance, making it suitable for a wide range of fishing conditions. This monofilament line comes in an eye-catching orange colour and is available in a generous 300m spool. With a test strength of 40lb up to 50lb, it is specifically designed for saltwater fishing. The specific weight of the line is 1.14, and it has a diameter from 0.57mm up to 0.62mm, ensuring durability and strength for various fishing scenarios.

Item Code	Diameter (#)	Diameter (mm)	Length (meters)	Test (lb)	Test (kg)	Type	Packing (pieces)	Colour
